

# Classes 32-35 - Personal Portfolio

---

## STEP 1: UNDERSTANDING THE ROLE OF A DEVELOPER PORTFOLIO

Having a personal portfolio has a multitude of benefits. It is a place to:

- Host your project & see your progression
- Showcase your skills and personality to potential employers
- Practice debriefing your applications by writing what you have learned
- Plan how you talk to future employers about your projects
- Demonstrate your commitment to learning
- Explore your personal brand or position as a developer
- Experiment with new technologies and stay up to date with tech trends

For our purposes, there are two most important things we want to focus on are creating a portfolio website. First, we want a place that showcases our projects for family and friends to see. The second is creating an online presence where employers can see your (fantastic) work and learn about you and your relationship with software development.

## STEP 2: GAINING INSPIRATION FOR A PORTFOLIO WEBSITE

Be inspired by, but do not steal:

- [Awwwards](#): The awards of design, creativity, and innovation on the internet.
- [Dribbble](#): Community where designers gain inspiration, community, and jobs and are your best resource to discover and connect with designers worldwide.
- [Panda](#): The homepage for your favorite websites.
- [Codepen](#): The best place to build, test, and discover front-end code.
- [Godly](#): Astronomically good web design inspiration every single day.
- [Behance](#): Leading online platform to showcase & discover creative work.

## STEP 3: PLANNING & DESIGNING YOUR WEBSITE

I have created two design templates. If you want to create your own, I suggest using Figma as a design tool or finding a template online you can base it on.

Design Template #1 - Simple & Clean

The screenshot shows a dark-themed website template. At the top left is the name "William Wilder". At the top right are three navigation links: "About", "Portfolio", and "Contact". The main heading "I Build Professional Front-End" is centered at the bottom in a large, bold, white font. The background features a faint, abstract image of a person working on a laptop.

# Websites & Applications

Problem solving and creativity have always been a part of my personality.  
I love creating functional and aesthetic websites for companies with a mission that inspires!

## Design Template #2 - Classy & Cool

A dark-themed website template. At the top, there's a navigation bar with links for 'Projects', 'About', 'Contact', and a GitHub icon. Below the navigation, a woman wearing a large black hat is shown from the chest up. To her left is a teal button labeled 'View My Projects'. Above the button is a small callout with the text 'William Wilder' and 'Download my resume &gt;'. To the right of the woman is a large, semi-transparent teal box containing the text 'Born problem solver.' and 'Learned developer.' in white and teal. Below this, there's a bio: 'Angular front-end developer aimed at creating amazing user experiences'. At the very bottom of the page is a footer section with the word 'ANGULAR' in teal and a heading 'Project Tracking Application'.

ANGULAR

### Project Tracking Application

Virtually facilitating iteratively mission critical game changers is crucial to our long-term silo. Change the way you do business - adopt senior enterprises.

The screenshot shows the homepage of Codehouse. At the top, there's a navigation bar with links for Features, Solutions +, Resources, Pricing, Log In, and Try for free. Below the navigation is a large hero section. On the left, there's a video player showing a person in glasses. On the right, there's a sidebar with code snippets and a message.

**Get help with coding from engineers.**

Learn how to code efficiently and create apps and games that work. Consult with best experts to apply skills in action.

```

1  Vue.component('todo-item', {
2    props: ['todo'],
3    template: '<li>{{ todo.text }}</li>'
4  })
5
6  var app = new Vue({
7    el: '#app',
8    data: {
9      groceryList: [
10        { id: 0, text: 'Vegetables' },
11        { id: 1, text: 'Cheese' },
12        { id: 2, text: 'Whatever else' }
13      ]
14    }
15  })

```

Hi Karen, what attributes should I use to have? Any

## REACT Email Inbox Dashboard

In the future, will you be able to iteratively strategize core competencies in your business? Going forward, our mobile brand will deliver value to stakeholders.

The screenshot shows the homepage of Mailflow. The header includes the Mailflow logo, a navigation menu with links to HOME, PLANS, FAQ, and CONTACTS, and sign-in/sign-up buttons. The main visual features a woman with a flower crown and a background of flowers and paper planes.

**Make Mailing Easy**

Get all your mail and messages in one flow. Boost your productivity with Mailflow, convenient all-in-one inbox for all your communication channels.

## STEP 4: CODING YOUR PORTFOLIO WEBSITE

Before beginning your project, you should go over with yourself the [project planning steps](#).

Decide on and clearly state:

- What technologies you are going to use
- The fundamental features you will implement
- Your intended audience and what they want to see (from project to sections on your page)
- How you will describe and write about your project on your website

## STEP 5: DEPLOYING YOUR WEBSITE & LINKING TO SOCIAL CHANNELS

- Use Netlify or a similar service to deploy your website
- Link to it on GitHub in your profile
- Host it on GitHub and create a Quick Link to it
- Post on LinkedIn and other Social Media channels
